Second Term English Exam

Duration : 03h00

Part one / Reading. (15 pts)

Read the text carefully then do the activities below.

Today, science fiction is widespread due to the high level of technology and science. Film makers focus on imagination and futuristic themes in order to magnetize the attention of the viewers.

For instance, the directors of the "Matrix", Larry and Andy Wachowski focused strongly on the futuristic themes and life after nearly two decades. Larry declared: "After two decades, robots will do everything." Andy affirmed: "If we let the robots do everything, the human being will be dependent strangely enough, he becomes a hostage!"

Life is based on: "Speculation and experiments" i.e. the human being can't anticipate the results in such a domain, but he uses the experiment to determine the exact results or achievements. In Science fiction films, the director neglects a part of speculations and experiments; instead, he focuses on science accompanied by imagination and traps.

Of course, there is a big difference between "Realism" and "Imagination", but Man uses imagination only to escape from the brutality of life and its difficulties.

from the internet

A/ Comprehension and interpreting: (07pts)
